Authorization for this examiner's amendment was given in a telephone interview with Thomas Bean, Reg. No. 44,528, on 25 May 2007.

corresponding to an upper limit of a turning displacement, the instruction value based on: a vertical axis coordinate corresponding to the steering angle on a predetermined hysteresis loop with one side being a section of a line $X_n = \pm X_E$ on a θ - X_n plane ; and a steering direction of the steering wheel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
